

1. Open PowerShell as Administrator

Search for PowerShell, right-click, and select "Run as administrator".

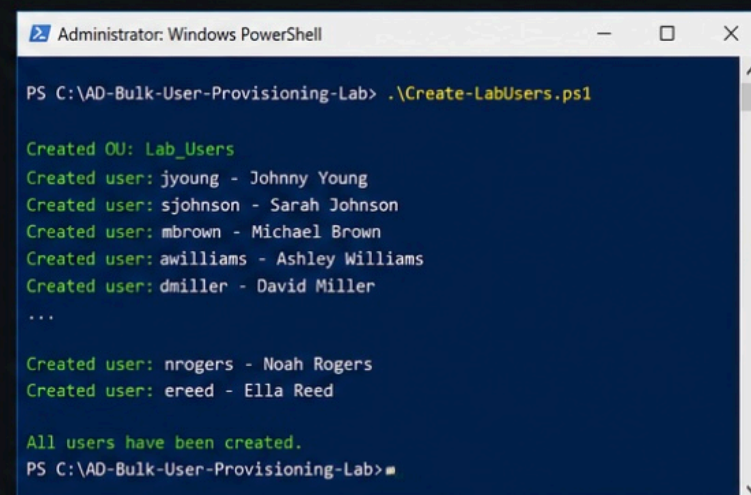

2. Navigate to Your Script Folder

Use the `cd` command to go to the folder where your script and CSV file are located.

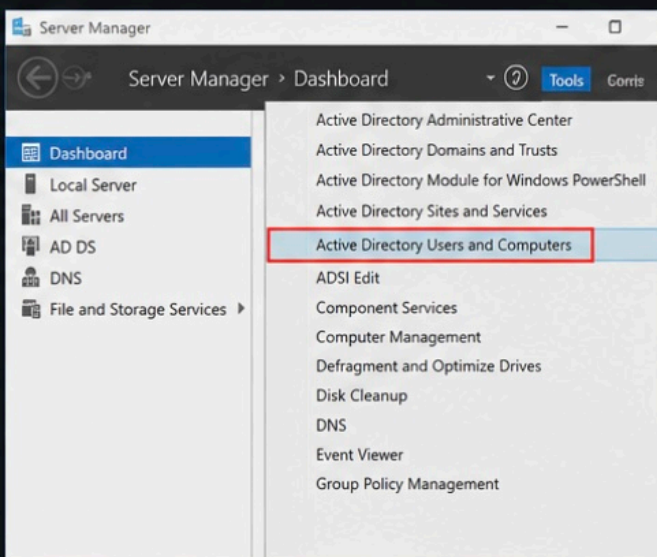

3. Run the PowerShell Script

Execute the script to create the 50 users in Active Directory.

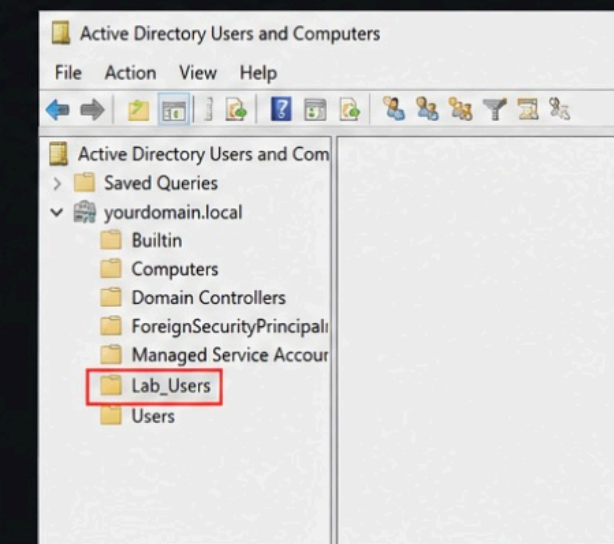

4. Open Active Directory Users and Computers

Open the tool from Server Manager > Tools.

5. Verify the Organizational Unit (OU)

Find the OU named "Lab_Users".

6. View the 50 Users

You should see all 50 newly created users inside the OU.
